

ENGINEERING ETHICS

SAR Sambo, Institut de Technologie du Cambodge

0

Ethics

DEFINITION

Ethics: the discipline dealing with what is good and bad and with **moral duty** and **obligation**.

Engineering Ethics: Ethics, applied to the field of engineering is the study of **value**, **issue** and **decisions** that are involved with the work of engineers.

OBJECTIVES

This course will help students to acquire the following moral competencies:

- **Moral sensibility:** the ability to recognize social and ethical issues in engineering;
- **Moral analysis skills:** the ability to analyze moral problems in terms of facts, values, stakeholders and their interests;
- **Moral creativity:** the ability to think out different options for action in the light of (conflicting) moral values and the relevant facts;
- **Moral judgment skills:** the ability to give a moral judgment on the basis of different ethical theories or frameworks including professional ethics and common sense morality;
- **Moral decision-making skills:** the ability to reflect on different ethical theories and frameworks and to make a decision based on that reflection; and
- **Moral argumentation skills:** the ability to morally justify one's actions and to discuss and evaluate them together with other engineers and non-engineers.

COURSE OUTLINE

- Lesson 1: The responsibilities of Engineers
- Lesson 2: Codes of conduct
- Lesson 3: Normative Ethics
- Lesson 4: The ethical cycle
- Lesson 5: The distribution of responsibility

TEXTBOOK

- *Ethics, Technology, and Engineering* by Ibo van de Poel and Lambèr Royakkers (Wiley-Blackwell, 2011)

SCHEDULE

- 10 Sep. 2025 (09:00-11:00)
- 17 Sep. 2024 (14:00-16:00)
- 01 Oct. 2025 (09:00-11:00)
- 08 Oct. 2025
- 22 Oct. 2025
- 12 Nov. 2025
- 19 Nov. 2025
